

The single most important upgrade you can make to your GLOCK pistol is replacing your factory sights, ZEV Technologies sight sets are machined from quality steel and coated to protect the finish. Sights are available in different heights. Whether you are looking to increase accuracy or co-witness your red dot optics, ZEV has you covered.

ZEV FRONT SIGHTS

ZEV front sights are designed to be used with one of the many rear sights available for GLOCK factory replacement and are an excellent and cost-effective upgrade. Best suited for ZEV combat rear, the ZEV front sight gives you everything you need to upgrade your sight picture to shoot like the pros and comes in either Black or Fiber Optic.

- A clean serrated post for a glare free sight picture
- Improved accuracy due to ease of target transition and acquisition
- CNC-machined stainless steel construction
- Black DLC coated for hardness and resistance to wear
